

# Vanilla Icons Reference

Adapt provides a selection of icons from <https://icomoon.io/>. They are deployed via an icon webfont named "vanilla." It is part of the framework core and located at `src/core/fonts/vanilla.woff2`. Also at the same location is the selection file which can be used on the IcoMoon website to extend this collection. Read more at <https://icomoon.io/#faq/save-load>.

The associated names and escaped code points are used within CSS.

Visit [ADAPT.tips](#) for more help with the Adapt framework and authoring tool.
